COURTROOM TECHNOLOGY
Northern Division

The U.S. Bankruptcy Court, Central District of California, is committed to providing up-to-date technology for exhibit presentation in courtrooms. The Court's goal is to implement and utilize state-of-the-art technologies that are easy to use and intuitive for case participants (i.e., parties, attorneys, and witnesses).

This document provides insight into the technology utilized within Northern (Santa Barbara) division courtrooms and a glimpse of what other bankruptcy courtrooms in the district have or will receive in the future. Participants should familiarize themselves with any equipment they intend to use before participating in any court matters.
